PACIFIC POWER CONSULTING

Capabilities Brief | Sitka, Alaska | November 2026

www.PacificPowerConsulting.com · tony@ppcalaska.com · +1 907-796-9046

Independent owner's representative for Alaska's medium- and high-voltage power systems: project development, operations services, and capital program management.

Public and private power systems and facilities

Who We Are

Pacific Power Consulting (PPC) is an independent, Alaska-based owner's representative and project-development firm. We serve municipal and cooperative utilities and the private power systems behind mines, hospitals, seafood processors, ports, resorts, remote camps, and federal facilities. PPC gives them coordinated technical support.

Core Services

01 Owner's Representative

- Construction and inspection witnessing
- Vendor coordination
- Constructability input
- Permitting support
- Specification review

02 Project Development

- Needs assessment and feasibility
- Site review and route selection
- Permitting and right-of-way acquisition
- Engineering and design coordination
- Procurement and contractor selection

03 Operations Services

- GIS and asset management
- Overhead and subsea ROV/AUV inspections
- Vegetation management
- Regulatory compliance and testing
- Technical recruiting

04 Capital Program Management

- Identifying and defining project needs
- Project planning
- Executing
- Monitoring and controlling
- Project closeout

Engineering: where a project needs calculations or a PE seal, PPC coordinates it through independent Alaska-licensed engineering partners acting as engineer of record.

Sectors Served

- **Electric utilities:** municipal, cooperative, small investor-owned
- **Mines:** substations, arc-flash, tailings and process water
- **Hospitals:** main service and standby power
- **Seafood processors:** plant power and standby generation
- **Ports and cruise terminals:** shore power, cranes, piers
- **Resorts, lodges, remote camps:** microgrids, standby power
- **Federal facilities:** NDAA-compliant inspection, procurement-ready documentation

Why Owners Choose PPC

- **Independent.** We plan and manage the work on the owner's side, so our advice and procurement recommendations stay defensible.
- **Alaska bench.** A network of independent engineering, survey, and specialty partners.
- **Staged and transparent.** Each stage has a stopping point, an independent check, and your approval. Travel is priced per trip.
- **Stay in control.** You keep operating your system; we take on the program work your staff doesn't have time for.

Field Visits

Based in Sitka, we schedule field visits across the region so travel is shared between sites. That keeps support affordable for smaller systems.

Getting Started: Contact us to schedule a readiness review

1 Readiness review

Ownership, load, structure and active obligations, matching funds, asset records, and capital gaps. Ends with a go/no-go memo, a practical scope, and a costed plan.

2 Engagement sized to your system

A standing monthly engagement or a scoped project, priced per engagement, with status visible as the work proceeds.
